## **Engineering Statement**

This data has been prepared in support of the Application for Renewal of License for television station WHSG channel 63, Monroe, Georgia for Trinity Christian Center of Santa Ana, Inc. d/b/a Trinity Broadcasting Network. This statement provides data on the environmental levels of RF energy in the vicinity of the transmitter site of WHSG. WHSG is licensed to operate with an effective radiated power of 5000 kw in the horizontal plane and 1167 kw in the vertical plane with a center of radiation of 343 meters above the ground. Employing the methods set forth in *OST Bulletin No. 65* and considering the vertical patterns of both the horizontal and vertically polarized components of the pattern of the Andrew ATW30H3-ESC3-63H elliptically polarized antenna, I calculate that maximum ground-level power density to be less than 0.011 milliwatts per square centimeter at any distance from the tower base. This figure represents a contribution of less than 0.4 percent to the maximum allowable ground-level power density from broadcast sources. The FCC guideline for channel 63 is 2.5 milliwatts per square centimeter.

I declare under penalty of perjury that the foregoing statement which has been prepared by me is true and correct to the best of my knowledge and belief.

### SUPPLEMENTAL RF COMPLIANCE STATEMENT

WHSB-TV certifies compliance with the standards established by the American National Standards Institute regarding RF radiation. In addition, in order to protect the general public warning signs are posted at the transmitter/antenna site, and a fence surrounds the site.

WHSB-TV modifies its operation so that if station personnel must climb the tower for repairs or maintenance, appropriate steps are taken (e.g., power reduction) to assure an absence of excessive RF exposure.

## FILING INSTRUCTIONS

Broadcast station licensees are required to afford equal opportunity to all qualified persons and to refrain from discriminating in employment and related benefits on the basis of race, color, national origin, and sex. See Section 73.2080 of the Commission's Rules. Pursuant to these requirements, a license renewal applicant who employs five or more full-time station employees must file a report of its activities to ensure equal employment opportunity for women and minority groups (that is, Blacks not of Hispanic origin, Asians or Pacific Islanders, American Indians or Alaskan Natives, and Hispanics). If minority group representation in the available labor force is less than five percent (in the aggregate), equal employment opportunity (EEO) program information for minority group members need not be filed. However, EEO program information must be filed for women since they comprise a significant percentage of virtually all area labor forces. If an applicant employs fewer than five full-time employees, no equal employment opportunity activity information need be filed.

A copy of this report must be kept in the station's public file. These actions are required to obtain license renewal. Failure to meet these requirements may result in license renewal being delayed or denied. These requirements are contained in Section 73.2080 of the FCC Rules (47 CFR 73.2080), and are authorized by the Communications Act of 1934, as amended.

- ☐ If your station employs fewer than five full-time employees, check the box at left, complete the certification below, return the form to the FCC, and place a copy in your station's public file. You do not have to complete the rest of the form.

If your station employs five or more full-time employees, you must complete all of this form and follow all instructions.

- ☐ If minority group representation in the available labor force is less than 5 percent (in the aggregate) and you choose not to file EEO program information for minority groups, check the box at left and complete the rest of this form with only the information for your program directed towards women.

## CERTIFICATION

### STATEMENT

All employees of WHSG-TV receive at least 40 hours of on-the-job training provided by the station staff, which gives each employee, whatever his or her job title, a basic understanding of certain aspects of station operation, including: the station log; the program log; what the master control does; the EBS checklist and procedures; and a description of the station's equipment, identity, purpose and operation. Each employee is given a written manual covering these topics, as well as others, for reference and study.

This general training in basic station and FCC procedures and the written manuals, gives the staff greater versatility, and assists the station staff in identifying and promoting employees who have talents in areas other than those covered by their specific job title.

WHSG-TV maintains contacts with various recruitment services, as noted in Form 396.
